Why Code Blue?

You have a lot of options. What makes Code Blue the ideal choice over other manufacturers when it comes to emergency communications?

- More than 30 years as a pioneer in development and production of emergency communication solutions
- "Security First" mindset, focused on maximum durability and reliability
- Compliant with latest codes, laws and regulations
- Superior customer service and technical support programs
- Custom solutions to create right solution for any location
- Crafted in Holland, Michigan USA from American-made components

What makes our products unique?

ENCLOSURES

- Dozens of enclosure options, including our trademarked cylindrically designed pedestals
- UL compliant
- Intensive wet or powder-coat paint process that provides maximum shine and corrosion, weather, UV and graffiti resistance
- Energy efficient and highly visible LED lighting
- Second faceplates that provide flexibility for additional security devices and future upgrades

EMERGENCY PHONES

- Analog and VoIP technology to match network needs
- Full duplex capabilities for natural and superior communication
- Self-diagnosing capabilities that monitor status of microphone, button and speaker
- Piezoelectric buttons that contain no moving parts and won't stick or jam

CENTRY®

- 1080p, 125° fixed IP color camera
- Programmable ring-lit piezoelectric buttons that won't stick or jam
- Full duplex VoIP communication
- Powered by EmerComm®, Code Blue's powerful device operating system

PUBLIC ADDRESS

- 360-degree, six-speaker design provides optimal sound dispersion
- 400-watt output for superior power and volume
- Maximum intelligibility to meet NFPA 72 Chapter 24 regulations

TOOLVOX®

- Remote and onsite system configuration
- Brings together analog and IP devices on a single platform
- Device-monitoring and provisioning options
- Scheduled testing of connected devices
- Connects directly to public telephone network, PBX or ISP for remote monitoring and support
- Cloud and VM options available

BLUE ALERT® SOFTWARE

- Deliver messages simultaneously to public address, social media, text message, email, desktop alerts, digital signs and more
- View and compile incident information during and after events
- All incident data securely archived for future use
- Remotely control gates, doors, lights, speakers and more
